

Evaluation of cultural exchange project HU15A, Växjö, Sweden

Longer project time so that we could have more oral Skype discussions.

More interaction through the live function.

Longer final discussion. 10 minutes was too short.

Shorter project time, so that we could work with other things too

Good to have a final essay, to analyse and sum things up.

More words and longer time to write the essay.

Skype discussions without a particular subject

One-on-one discussions

Quizzes and competitions

Some learned new things about using an online platform, and some learned new things about making movies or using PowerPoint etc.

A few students were very uncomfortable with presenting themselves.

Maybe we could also have sent each other real letters.

Why not have contact now and then during the entire school year, or at least a semester. That would deepen the relations and make it easier to discuss things.

A Facebook group could have been used together with Twinspaces.

Maybe we could have watched a movie and then discussed it.

The messenger function on Twinspaces was slow.

It was good that we, the students, had a lot of influence on the contents of the project.

We could share photos with captions

Maybe include more classes around the world.

An idea is to collaborate in writing short stories.
